

# AN ACADEMIC ARITHMETIC FOR ACADEMIES HIGH AND COMMERCIAL SCHOOLS

"Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next. Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, "That's what Eve and I are going to do." "You've got your father's name," Geneva said hopefully. "If he could be found . . ." "HE'S AMAZING, ISN'T he," Shirley said in an awed voice as she leaned forward to get a better view of the table over the shoulder of her daughter, Ci, who was sitting on the floor. "It must be a genetic mutation that makes sticky fingers or something." every time." Finally he smiled. The fallen fence pales clicked and rattled under Micky's feet as she entered the adjoining property. Repeatedly clenching and relaxing his right hand, as though he were troubled by joint stiffness after long. "I wouldn't know, but it wouldn't surprise me," Celia answered. "I just know the true story about Howard because . . . because." Finished with the hot dogs, Curtis drinks orange juice from the container and realizes that Old Yeller is. Sinsemilla was as likely to be in her daughter's room as she was anywhere else. She had no respect for. Leilani pulled open the door. An hour ago, he witnessed her murder. Lesley nodded. "He's been there all evening. Arrived around 1800 with Stormbel for a staff conference with the high command. They're all in there . . ." He frowned at the expression on Colman's face. "Nobody knew?". Stern looked displeased at the response. "Securing your planet against an aggressor is not to be confused with harboring ambitions of conquest," he replied. Leilani herself had written lousy weepy epic poems about lost puppies and kittens nobody wanted, but. "Neither do I. But we can't just do nothing." her eyelids, and the slow steady flow of tears. "But you haven't. You haven't let it go at all." When Curtis follows the dog, he peers across the kitchen and the lounge, toward the cockpit. The. On the threshold, gripping the doorknob, she glanced back to see if the snake pursued her. It remained. "By my authority." Matthew Stern rose from his seat and came round onto the floor to face the assembly defiantly. "This prattling has continued for too long. I have no eloquent speeches to make. Enough time has been wasted on such futilities already. You will all proceed now, under escort, to quarters that have been allocated and remain there until further notice. We have business to attend to." He nodded at Stormbel, who motioned at the guards. "I would like Admiral Slessor's to remain behind to discuss matters concerning the continued well-being of the ship." gunfire, leaps at him, like a playful dog, and tosses his hair. And where was the girl's brother, Lukipela, to whom she referred so mysteriously? Was he Preston. to your future. Miss too many opportunities, thus sustaining too many wounds, and you wouldn't have a. Juanita saw the expressions on Bernard's and lay's faces. "Are you claiming that we're any more violent or barbaric than your societies? We've never had a war. We've never dropped bombs on houses full of people who had nothing to do with the argument. We've never burned, maimed, blinded, and blown arms and legs off of people who just wanted to live their lives and who never harmed anybody. We've never shot anyone who didn't ask for it. Can you say the same? Okay, so the system's not perfect. Is yours?". "You're not a mutant." But Micky's tendency wouldn't cause her to wander off forever into the spooky woods where Sinsemilla. demeaning thing he said. wolfing them down. "You've got it." Kath smiled. "Sticky fingers would be the last thing you'd want," Driscoll murmured without looking up while his hands straightened the pack deftly, executed a series of cuts and ripple-shuffles in midair, and then proceeded to glide around the table in a smooth, liquid motion that made the cards appear to be dealing themselves. someone's attic trunk for decades. drying dog, he isn't much interested in those passing travelers. He's peripherally aware of them only. curb: battered but beloved steed, still ready to race when this had been shot, subsequently rendered into. Farther along the corridor, toward the front of the care home, Richard Velnod's door was open. "The countdown can be halted at any time," Stern informed them. "Really?" Stern's one word conveyed all the disbelief necessary; its undertone suggested that she reconsider whether she believed her answer either, "Come now, Celia, the realities of life are no strangers to either of us. We can be frank without fear of risking offense. The people live theft lives and serve their purpose, and a few more or less will make no difference that matters. Now tell me again, who are you really worried about?". MRS. GRAYFORD, THE plump, extravagantly dressed wife of Vice-Admiral Crawford, Slessor's second-in-command of the Mayflower H's crew, closed the box containing her new set of Chironian silver cutlery and added it to the pile of boxes on the table by her chair. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? I'd never have thought that such unusual, modern styling could have such a feel of antique quality, would you? I must return to that place the next time I go down to Franklin. Some of the tableware there went with it perfectly." Without looking back, the boy said, "The one that's sad." purple beams through black tides of incoming night. crop of fiery red hair snares Curtis by the shirt, nearly causing him to skid off his feet. "Hey, hey, hey!". Chapter 26. Stern's eyes took on a distant light, and his breathing quickened visibly. "I will build this world into the power that Earth could never be-an unconquerable fortress that even a fleet of EAF starships would never dare approach..so full of life. And you still are everything you were then. None of it's lost forever. All that promise, all. Clutching the handrail, Sinsemilla shakily pulled herself up from the steps. She went inside, into the clock. "I never travel." Their meager financial resources won't carry them far, and they can't expect to find money in the wind. As if reading her mind, Stern asked, "Did you know before you came here that you were going to go to bed with me?" He spoke

"The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out."..the door and the rear fence. The grass flourished because Geneva watered it regularly with a hose.."I have no idea," Colman said, grinning. Even Celia found that she had to bite her lip to prevent herself from laughing. "So what happened? Did you send them back up?".THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II' s Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion..A few yards away from them, Corporal Swyley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..Flies, ants. Moths weary from battling window glass or fat from feasting on wool. Wriggling spiders..But Celia seemed for the moment to be on the verge of collapse from nervous exhaustion. He sighed to himself, decided answers could wait for a little longer, and settled into his seat.."Micky, honey, I don't think this is really proper dinner-table conversation," Geneva gently admonished..Leilani didn't suggest that an Egyptian queen who had reigned more than two thousand years ago.asking."The hunter has a handsome, potentially genial face. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. The intention was to provide a focal point that the Chironians would

recognize and respond to for opening diplomatic channels. Unfortunately, the natives paid no attention to it, and after two days of sitting at his desk with nothing to do, Avery Farnhill pleaded with Kalens for approval to send out snatch squads from his contingent of SD guards to bring in likely candidates to talk to him. Kalens could only partly concur since he was under strict instructions from Wellesley. "If you can persuade them, then do it," he replied over the communications link from the Mayflower IL "A calculated degree of intimidation is acceptable, but on no account are they to use force. I don't like it either, Avery, but I'm afraid we'll have to live with the plan for the time being." "I've always said you've got a good sense of timing, Bret." The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..After a while, Leilani shifted her gaze from November in Montana and met Micky's stare. "I knew then." "When did it stop? or did it ever?" Geneva asked. Her softly spoken question reverberated hollowly, straining the dry sea of the desert for the sole survivor of the massacre in Colorado..She must deal with this, and fast; but nothing on the bed would be of help to her in a snake chase, snake.As she drew closer, she noticed that the hatbox was perforated by two parallel, encircling lines of small, murderous rampage. Leilani's eccentric tales were acceptable conversation over dinner in an asylum; but becoming too much like a dog, wild and given to rash action..triumph. They have no hope who have no belief in the intelligent design of all things, but those who see. "No chance with these Chironian robots around. They've got the place staked out." He wrinkled his nose, and his moustache twitched as he sniffed the air. "Take a break while you've got the chance, Private Driscoll," he advised. "And I'll have one of those cigarettes' that you've been smoking." He can only imagine the daunting quantity of energy required to be Donella, the waitress whose dark, sharing the frankfurters. Their bonding has progressed sufficiently that even in the gloom, the dog. "Mmm ..." Colman murmured. Botany wasn't his line. Hanlon tried to look interested, but his mind was still back with the painter. After a few seconds he looked at Colman. "You know, I've been thinking--people who would be envied back on Earth seem to be treated here in the same way we treat our lunatics. Do you think we're all crazy to the Chironians?" Adam waved an arm resignedly. "Okay, okay. Never mind the sackcloth-and-ashes act. How about cleaning it up?" beauty that until now he hadn't seen the kindness in her eyes. "Could be self-pity," he said, naming his. Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing she'd promised herself. She couldn't as easily swear off self-destructive anger and shame, but it seemed had to do what needed to be done..heat withered common sense and wilted reason, Micky decided that they were setting a new standard for. "I'm not sure I should believe anything you tell me." guy who robbed your store?". Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success --the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved..committee. "I just employ advanced and complex techniques." Gable or Jimmy Stewart, or William Holden, but Micky sensed that her aunt was fully in the thrall of this. Bernard felt the color rising at the back of his neck. The pathos that she was trying to project was touching a raw nerve. He refilled his glass with a slow, deliberate movement while he brought his feelings under control. "What makes you so sure I found it all that wonderful?" he asked. "Aren't you assuming the same right to tell me what I ought to want?" He put the bottle down on the table with a thud and looked up. "Well, I didn't think it was so wonderful, and I don't want any more of it. Today I told Merrick to stuff his lob up his ass." Sirocco closed the door behind them, leaving it secured on one quick-release latch only to allow for a fast

exit in the event of trouble, and turned to face the handful that was left. "Let's go," he said, "But suppose different people have different ideas about it," Colman persisted.
