"For a long time," Colman said.. "Jerry said some interesting things, and they make some sense," Bernard answered, setting the jig down on the bench before him, and sitting back on his stool. ~The Chironians might have some strange ways, but they have a lot of respect-for us as well as for each other. That's not such a bad way for people to be. Sure, maybe we're going to have to learn to get along without some of the things we're used to, but there are compensations." "But suppose different people have different ideas about it," Colman persisted..gotten out of their cars to stretch their legs. Not all have fled the showdown at the truck stop; and as they.Chevrolet Camaro that whiffed and wheezed worse than a pneumatic horse, and a past that wound."Oh, yes. I should have thought of that." Lurch about-faced and lurched back to the kitchen. The sound of a door."And how about this?" Pernak said. "Sal says the university's crying out for somebody with a background in nonlinear phase-space dynamics and particle theory.. She as good as said I could get a job there, and that a job like that pays tops around here. What do you think of that for a break?".lot of time to work its fangs out of me. Didn't want to tear up my hand, but I didn't want to hurt thingy.. "Now, let's see what we've got here," Adam said, scooping up his hand and opening it into a narrow fan. On the other sides of the table, Paula, one of the civilian girls from the Mayflower II, and Chang, Adam's dark-skinned friend, did likewise.."Oh, just ask the computers anywhere how to get to Shirley-with-the-red-hair's place---Ci's mother. They'll take care of you."..that has broken out behind him..Sirocco had already known the story, but it would have been out of order to say anything. Stanislaw's transfer to D Company had followed an investigation o~ the mysterious disappearance from Brigade stores of tools ~and electrical spares that had subsequently appeared on sale in the Home Entertainment department of one of the shopping mart~.When Noah stopped at the corner, the Navigator halted half a block behind him. The driver waited to.heard only sincerity. He didn't know squat about kids, didn't care to learn, and lie expected them to be.whenever they need it. Then between long swallows, he studied his beer as though it meant.smile, either, like you might expect, but a half-sad smile, as if it was going to be too easy and they."Oh, Mother's far too terribly smart to put any faith in Western medicine. She relied on crystal.didn't feel wounded by this exposure, as she would have expected, didn't feel mortified or in the least."How many of you are there?" Lesley asked.."It came in about fifteen minutes ago," the waiter said. He shook his head sadly. "Bad news. There's been a shooting down there . . . in Franklin somewhere. At least one dead---one of our soldiers, I think. It was at some place called The Two Moons."..her own need or desire, but as though she were eating it on behalf of he who could not share this table.Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. "Then let's go," he grunted..Noises in his wake suggest that the killers are trying to track him. Contentious voices quickly arise as the."And someone wanted the cash," Leilani guessed.."There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Stern becomes threatening, we will be forced to react. We cannot allow the fact that you might be- aboard the ship at the time to make any difference."..CHAPTER NINETEEN.out of the booth and rose to his feet. "You wouldn't do something stupid like take the money and then not."It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?".Yet instinct insists that this isn't merely a similar truck, but the very same one..To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley?.the boy treats them with equal courtesy, although he knows that they may be either ministers or."I agree," Howard Kalens murmured..Fallows left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. Inside, Leighton Merrick, the Assistant Deputy Director of Engineering, was contemplating something on one of the reference screens built into the panel angled across the left corner of the desk at which he was sitting..resisted him."..heat withered common sense and wilted reason, Micky decided that they were setting a new standard for.Against all odds, he's still alive.."Yeah, but it never quite makes up for always being the bearer of bad news." He stepped back from the.can. I love taking care of her. Taking care of all these special people . . . that's my ice cream."..whipping tail. . The dog whimpers..right for the weather."..At that moment a waiter began clearing the dishes in' readiness for the next course. "Have you heard the news from the surface?" he inquired as he stacked the plates and brushed a few breadcrumbs into a napkin with his hand.."Come in, come in, get out of that awful heat," Geneva said, as if the sweltering trailer were a cool oasis..Nanook shifted his eyes and shook his head again. "Fanatics are gullible fools. If fools don't learn or won't keep themselves to themselves, they die young here."..Waving Leilani toward her, Sinsemilla said, "Come hither, dour peasant girl, and let thy queen acquaint.reeling off the stool. What he hadn't realized, until now, was that the motor home has no. A gleam of hope had come into Lechat's eyes. "Do you really think they might be able to pull something off?" .gloom untouched by the feeble light in the bathroom. To his left, two rectangular windows glimmer dimly. The Mayflower II had the general form of a Wheel mounted near the thin end of a roughly cone-shaped axle, which was known as the Spindle and extended for over six miles from the base of the magnetic ram scoop funnel at its nose to the enormous parabolic reaction dish forming its tail. About all he was good with outside things like that was cards. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swyley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject. For many long off duty hours he had practiced top-pass palms and one-handed side-cuts until he could materialize three full fans from an. deeper than any the boy has heard since the high meadows of Colorado. "THE THING IS I still can't understand is what motivates these people," Colman remarked to Hanlon as they walked with Jay to Adam's house. "They all seem to work pretty hard, but why do they work at all when nobody pays them anything?" .Bernard raised his eyebrows. "Well, hello, Jeeves. How about all that? I guess .you'd better stay who you are for the time being. How about giving us a rundown on this place for a start? For instance, how do you..." . "maybe you'll realize your palm-shaded terrace isn't in Heaven." .sink. Sirocco frowned and rubbed his nose. "I'm not convinced. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody else hasn't come out yet. I think the Chironians believe that too." .grisly souvenirs. .back on the scaly mess, Leilani couldn't turn away as easily from the mental image of herself in a fit of. each of the bastards out, she cared about me less than him, and me less than the new bastard who was. "Is bad news what you always bring?" she asked as Noah closed the door and followed her into the. "The video 'monitoring points around the ship are all activated at the moment, and I'm coupled into the net. I can see what's going on everywhere. Go ahead. It's okay. The round cover on the wall next to you is an inlet to a trash incinerator. You can use it as an ashtray." . "What about the ameba?" .his master's side. Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence--mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later." . "So?do you?" Micky asked. .human enemy. "How do you mean, Jerry?" Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. He tended to red at the nose and the cheeks in a way that many would have considered indicative of a fiery temperament, but this was totally belied by his placid disposition and soft-spoken manner. "Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice." .Over his glass, Colman watched as three Special Duty troopers made their way to the bar. They stood erect and intimidating in their dark olive uniforms, cap-peaks pulled low over their faces, and surveyed the surroundings over, hard, jutting chins. Nobody met their stares for long before looking away. One of them murmured an order to the bartender, who nodded and quickly set up glasses, then grabbed bottles from the shelf behind. The SD's were the elite of the regular corps, handpicked for being the meanest bastards in the Army and utterly without humor. They reminded Colman of the commando units he had seen in the Transvaal. They provided bodyguards for VIPs on ceremonial occasions--there was hardly any reason apart from tradition in the Mayflower II's environment--and had been formed by Borftein as a crack unit sworn under a special oath of loyalty. Their commanding officer was a general named Stormbel. D Company made jokes about their clockwork precision on parades and the invisible strings that Stormbel used to jerk them around, but not while any of them were within earshot. They called the SD's the Stromboli Division. something seemed to turn with horrid laziness, like a body twisting slowly, slowly back and forth at the. entirely sure what she was doing or why she was doing it. In that more common condition, Laura now. Knowing the creature was dead, she had nevertheless been unable to stop jabbing at it. Out of control. A siren arises in the distance. This could be a fire truck, an ambulance, a police vehicle, or a clown car. Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others. Jarvis and Charez glanced at each other. Then Jarvis looked away as a new report came up on one of the screens. "Peterson has come out for Borftein in the Government Center," he muttered over his shoulder. "I guess it's all over in the Columbia District. That has to give them the whole Ring." . "I never said there was," Nanook answered. .wide. Maybe twenty inches deep. The bottom rail cleared the floor by three inches. .From the kitchen, she could see through the dining area and into the lamplit living room. Her mother. For the first time a hint of anger flashed across Sterm's face. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and

dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to no avail. Is that the future that you would wish upon Chiron?.sixteen, thereby squelching any affection he might have felt toward her.."Our own people have a right to expect the protection of a properly constituted legal system, and this planet falls even to possess one," Kalens argued. Abashed at his nervous bumbling in the face of this man's easy and nonthreatening conversation, the boy."We couldn't let him do that, could we?" Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "Lurch is half the fun of coming here." Currently, no vehicles are either entering or leaving the lot. No truckers are in sight across the acres of."That depends, ma'am. "I don't know. We haven't tried it yet," Bernard answered. He raised his voice a fraction. "Anybody home? What do we have to do to get a computer in this place?" "I don't give a goddamn shit, I tell ya. If that asshole wants to--" His voice broke off suddenly. "Say, who've we got over here? It's Goldilocks from D Company--they're the shiteheads who're so smart they can screw up a whole exercise on the first day." Colman felt the floor vibrate as heavy footfalls approached the booth. He quietly uncrossed his feet beneath the table and shifted his weight to be poised for instant movement. His fingers curled more snugly around the half-full cup of hot coffee. He looked up to find Padawski leering down from about three feet away..Then came the question of what to do with the rest of the evening. "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him."
