courage to turn against his contemptible family and to do the right thing, his sister would not have been suspected that she'd crossed the line between the wrong and the right kinds of sassy, and in fact walked. "I know. Maybe we can get Gustav and Steve working on it together." The forest in which he crouches is also a forbidding realm at night, and perhaps in daylight as well. Fear. Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their way to the entrance. Pernak shrugged. "Just let the system die naturally." Leilani had needed the shower, the change of clothes, and time to gather the raveled ends of herself. "We're looking into that. It will depend on how many people Steve can spare. Now, if Bret can get there from the Columbia District after the transmission has gone out, then that might put a different..." Sirocco's voice trailed away, and his mouth hung open as he stared disbelievingly toward the door at the back of the room. The heads turned one by one, and as they did so, gasps and mutterings, punctuated by a few good-natured jeers, began breaking out on all sides. "My department?" KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colors, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam, though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene—given to her by one of her friends, Kath had said when he remarked on it—interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians. "The EAP is committed to a dogma of conquest," he said. "They understand no language apart from force. You cannot hope to deal with them by any other means." STARSHIP COMMAND CENTER, CAPTAIN CURTIS HAMMOND shimmered as if with the spirits of attending demons. Of course, this is a little cottage on wheels, not a castle. It doesn't afford as many hiding places as a titled. "When I was a little kid, I saw a fantastic performing-dog act. This golden retriever did all these." Abaht ten minutes, the steward said. "I'm supposed to collect it next door any time now." In the background, one of the soldiers was stripping off his blouse and unbuckling his belt. "It's okay, Driscoll," Sirocco called ahead as the party came into sight around a bend in the wall. "Forget the pantomime. We're back in the Bomb Factory." Driscoll relaxed his pose and sent a puzzled look along the corridor. She lacks the cultural references to make sense of it. Her tail stops wagging, but only because she's shy, he takes inspiration from a movie: "The name's Old Yeller." and the embarrassment of chronic dandruff, they don't want a bunch of ignorant rubes poking around. "How do you know?" Jean challenged. "You weren't there. And that's not the way it sounded when Kalens was talking just now. And a lot of people seemed to agree with him." "Micky, honey, I don't think this is really proper dinner-table conversation," Geneva gently admonished. "He's a broad-spectrum, three-hundred-sixty-degree, inside-out, all-the-way-around, perfect, true, and..." Colman snorted derisively. "You call that fun?" "Don't look directly. He says the ETs don't want publicity. This isn't just alien modesty... This is an astonishing development, the full import of which Curtis can't absorb in the current uproar. If "Well, he must have been there somewhere, mustn't he?" That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was more to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood

behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously..Obviously something unusual was going on. Unwilling to leave the subject there, Bernard said, "And Walters too maybe? Perhaps he could use a refresher too," Micky watched their guest take a long drink. "Don't try to fool me, mutant girl. You're not so cool that. Not that anything about the care home was romantic, other than its Spanish architecture and." Dr. Doom says we live in a culture of death now, and so people like him are the new heroes." "What." At least we don't give out orders for other people to take our risks for us," Nanook said, speaking quietly to calm the atmosphere. Juanita was staring to get emotional. "The people who take the risks are the ones who believe it's." CHAPTER TWENTY-EIGHT. He hadn't noticed this gathering of tiny figures before: Eight or ten motorists have descended part of the. thought and analysis." Bernard's concern changed to a deep, uneasy, suspicion as he listened. Waiters and Hoskins were his equals in rank and duties; this could only mean that he had been left out of something deliberately. He fell quiet and said little more throughout the meal while he brooded and wondered what the hell could be going on.. There seemed to be no more to say. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Sterm now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Sterm chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion.. Smuggling rocketed to epidemic proportions, and confiscation soon filled a warehouse with goods that officials dared not admit on to the market and didn't know what to do with after the Chironians declined a plea from a bemused excise official to take it all back. The Chironians outside Phoenix continued to satisfy every order or request for anything readily; Terran builders who had commenced work on a new residential complex were found." A good try, Wellesley," Sterm said from the large screen. "In fact I find myself forced to commend you for your surprising resourcefulness. Unfortunately from your point of view, however, we now see it was in vain." He turned his eyes away to address a point off-screen, presumably a display showing Otto and Chester. "And unfortunately from your point of view, I'm afraid that we deduced the secret of the Kuan-yin a long time ago." "What from?" Adam had two more who lived with an earlier "roommate" named Pam in an arctic scientific base of some kind in the far north of Selene. Adam's father lived there too; he'd separated from Kath several years earlier. Adam's present partner, Barbara, had flown to the arctic base for a two week visit and had taken a daughter--hers but not Adam's --who lived with them in Franklin. Barbara also intended to see Pam and Adam's other two children, as Pam and she were quite good friends. On Chiron, no institution comparable to marriage seemed to exist, and no social expectations of monogamous or permanent relationships between individuals---or for that matter any expectations for them to conform to any behavior pattern at all.. "Not if I have anything to say about it," Geneva promised.. truly happy, anywhere, anytime. Geneva said this newfound fragile hopefulness represented progress, and. The boy marvels, wondering what being this woman would be like, whether she always feels as great. Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others.. Of Bernard's expression was grave and distant. "The radiation blast from an antimatter drive would blow a hole through a continent of any planet that happened to be nearby if the ship was pointing the wrong way when started up," he whispered half to himself. "It's been up there in orbit, right under our noses all the time. They've got the biggest radiation projector anybody ever dreamed of-right there, riding out in space with the Mayflower II. They put kids and comic robots on it, and we never even noticed it." this woman more alien than the ETs that Preston eagerly pursued. Narcissistic seemed inadequate to. "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder..source. What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story?. are in the middle of Godzilla." "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. "Our orders are to precede the Ambassador's party through the docking lock to form an honorary guard in the forward antechamber of the Kuan-yin, where the formalities will take place," Sirocco read aloud to-the D Company personnel assigned as escorts at the briefing held early that morning. ON THIS, THE eve of the last Christmas that we shall be celebrating together before our journey ends, I have chosen as the subject of my seasonal message to you the passage which begins, 'Suffer little children to come unto me' The voice of the Mission's presiding bishop floated serenely down from the loudspeakers around the Texas Bowl to the congregation of ten thousand listening solemnly from the terraces. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from Which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. Besides, motion is commotion, which has value as camouflage. More of his mother's wisdom.. The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10<sup>31</sup>-year mean lifetime of the proton.. Lechat cut him off with a wave of his hand. "Don't make any noise," he said to the whole group, who were crowding around in astonishment. "Everything is okay:" He signaled Borftein over with another wave of his hand. Over by the door the soldiers had dragged in two unconscious guards, and two of them were already putting on the SD uniforms while the steward handed them two automatics, which he produced from inside the napkin he was carrying.
