He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. Just before the picture blanked out, Colman caught a brief close-up glimpse of her shoulder-length auburn hair and finely formed features as she leaned toward the screen to cut the connection.. "I probably will," the girl declared..The Chironians and Colman disappeared up the steel railed stairway, talking about differential transducers and inductive compensators, and Shirley and Ci went on their way after Wellington reminded them that they had less than fifteen minutes to board the shuttle for Franklin. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swyley with somebody else. Veronica was with them, wearing Army fatigue dress under a combat blouse,her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. Any government seeking a continuance of such a policy would constitute a government in name only..Kalens chewed on a slice of orange but made a face as if the fruit was bad. reaction for the moment. He stared at the companel where a screen showed a view from the Columbia District, where the SD guard commander had entered the Communications Center under a truce flag some minutes previously to talk with Borftein, and tried to separate the conflicting emotions in his head. Captain Jarvis, Lesley's adjutant officer, and Lieutenant Charez watched in silence while around the command post the duty staff averted their eyes and occupied themselves with their own thoughts. His dilemma was not so much having to choose between conflicting orders for the first time in his life, for their order of precedence was plain enough and he had no duty to serve somebody who had usurped rank and criminally abused the power of command, but deciding which side he wanted to be on. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group 'of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled' Terrans, and Terran troops in riot gear tried to separate them.."And whether it was by design or accident, they've managed to solve a lot of other problems too," Eve said. "Take crime for instance. Theft and greed are impossible, because how can you steal another man's competence? Oh, you could try and fake it, I suppose, but you wouldn't last long with people as discerning as Chironians. They can see through a charlatan as quickly as we can spot ourselves being shortchanged. In fact to 'them that's just what it is. They have their violent moments, sure, but nothing as bad as what's coming in from Africa on the beam right now, or what happened in 2021. But it never turns into a really big problem. There's no motivation for anyone to rally round a would-be Napoleon. He wouldn't have anything to offer that anybody needs.".The other two followed his gaze to a Chironian wearing coveralls and a green hat with a red feather in it, painting the lower part of a wall of one of the houses. Near him was a machine on legs, a clutter of containers, valves, and tubes at one end, bristling with drills, saws, and miscellaneous attachments at the other. A ground vehicle with a multisectioned extensible arm supporting a work platform was parked in front; and from a few yards to one side of the painter, a paint-smear robot, looking very much like an inexperienced apprentice, watched him studiously. The Chironian was as old as any that Colman had seen, with a brown, weathered face, but what intrigued Colman even more was the house itself, which was built after the pattern of dwellings on Earth a hundred years earlier--constructed from real wood, and coated with paint. It was not the first such anachronism that he had seen in. Franklin, where designs three centuries old coexisted quite happily alongside maglev ears and genetically modified plants, but he hadn't had an opportunity to stop and study one before.. "Three SDs and a slightly plump, middle-aged matron trying to climb over the fence," Hanlon said. "The woman was stuck on the top and making quite a fuss.
