"What's that supposed to mean?". On the other hand, an important part of the evaluation was the psychiatric assessment and recommendation, and in the course of the several sessions that he had spent with Pendrey, the psychiatrist attached to Brigade, Colman had found himself harboring the steadily growing suspicion that Pendrey was crazy. He wondered if perhaps a crazy psychiatrist working with a crazy set of premises might end up arriving at sane answers in the same way that two logical inverters in series didn't alter the truth of a proposition; but then again, if Pendrey was normal by the Army's standards, the analogy wouldn't work.. Three minutes; there was not a bubble on the water, and Amos surprised himself by deciding the only thing to do was to jump in and at least try to save the prince. But when two weeks had gone by and there was still no word from the Board of Examiners, he wondered if maybe he'd managed to squeak through. He didn't see how he could have. The examiner, a wizened, white-haired fuddy-duddy whose name Barry instantly forgot, had been hostile and aggressive right from the word go, telling Barry that he thought his handshake was too sincere. He directed the conversation first to the possible dangers of excessive sunbathing, which was surely an oblique criticism of Barry's end-of-August tan and the leisure such a tan implied, then started in on the likelihood that dolphins were as intelligent as people. Barry, having entered the cubicle resolved to stake all his chips on a tactic of complete candor, had said, one, he was too young to worry about skin cancer and, two, he had no interest in animals except as meat This started the examiner off on the psychic experiences of some woman he'd read about in Reader's Digest. Here and there in the audience, faces turned to glance curiously at one another. Clearly, this was not to be just another retirement speech. Congreve went on. "We have already come once to the brink of a third world war and hung precariously over the edge. Today, in 2015, twenty-three years have passed since U.S. and Soviet forces clashed in Baluchistan with tactical nuclear weapons, and although the rapid spread of a fusion based economy at last promises to solve the energy problems that brought about that confrontation, the jealousies, mistrusts, and suspicions which brought us to the point of War then and which have
