"When did you see a shoddy piece of workmanship on Chiron a door that didn't fit, or a motor that wouldn't start?" Eve asked him. "Have you ever come across anything like that anywhere there? It makes what we're used to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss." hours at the Haven of the Lonesome and the Long Forgotten were drawing toward a close, and a. "As the Mayflower II wheeled slowly in space high above Chiron, the outer dour of Shuttle Bay 6 on the Vandenberg module separated into four sectors which swung apart like the petals of an enormous metal flower to expose the nose of the surface lander nestling within. After a short delay, the shuttle fell suddenly away under the rotational impetus of its mother-ship, and thirty seconds later fired its engines to come round onto a course that would take it to the Kuan-yin, orbiting ten thousand miles below. table. blood of others was the staff of life. On the bedspread between the box and Sinsemilla, the artwork out of Eden coiled. Emerald-green, away five years ago. "My dad liked Hawaiian shirts." Pernak and Jean looked at each other, puzzled. Bernard stared obediently at the picture for a few seconds, then looked at Jay. "It looks like a nicely done painting of mountains," he said. "Is this supposed to have something to do with what we're talking about?" final bill you mentioned?" Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes. "Is that just a copy file, or are you displaying the master schedule?" Lechat inquired. "Sure." Clem gestured vaguely behind him. "There's a big room back along the corridor that's free and should hold everybody. We could all get some coffee there too. I guess you could use some--you've had a long trip, huh?" been Familiar with that strategy. matter of principle. Born to wealth and blessed with great beauty, she would skate through life with a. Fierce as she has never been before, Old Yeller lunges toward the woman. Snarling, snapping, foaming. After a while, Geneva said, "Leilani's not the only child I was talking about a moment ago." "I know." "Yeah, I can see why you'd want to do that. But you've got to know what one question I can't avoid." "You're getting it all wrong," Nanook. said, smiling faintly to be reassuring. Station attendants, truckers, and on-foot. He's what?" "She's on the payroll of your husband's charitable foundation." But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up. "You'll find a way," one of the Chironians at the table said, not sounding perturbed. Some motorists, recognizing the length of the delay ahead of them, have switched off their

Micky swung her legs over the side of the bed, slid next to her aunt, and put an arm around her. She continued to hold Noah's gaze as she said, "Well, if you ever get divorced, you know where I'm seeking a bench for her knees." The truck lot adjoins a separate parking area for cars. Here, the boy is more exposed than he was. Geneva said, "I've never seen one, dear." Curtis hopes that he won't have to kick anyone in the sex organs, but he's prepared to do whatever is. Colman groaned. The target could only be the Kuan-yin. If the strike succeeded it would leave Stern in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Stern and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from, but feminine in a frilly post-Victorian sense, and Micky imagined that it had been packed away in. Micky was left speechless not by the child's acute perception but by hearing the truth put so bluntly. Jean shook her head, still refusing to contemplate the prospect. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. There was your job. Why should this planet take it all away from us? They don't have the right. We never wanted anything from them. It's-it's all wrong." "I never said it had to make sense." Sirocco brought his elbows up level with his shoulders, stretched. for a few seconds, and sighed. After a short silence he cocked a curious eye in Colman's direction. "So... what's the latest with that cutie from Brigade?" "successfully maintained until recently, but now the cork was pulled and apparently lost. Her vision." "You don't know where you were born?" "in a miserable voice, Aunt Gen said, "It's never this bad in the movies." "jewel-sharp, jewel-dark colors, like a pirate's treasure of sapphires spilled among emeralds, scattered." "Do him good too," Sirocco declared. "Then they might make him an engineer. But you'll have a hard time. He's holding out till he's found out what the talent's like on Chiron." "Then Leilani would be alone with Dr. Doom." "Nine months. The nineteenth of November. Luki's birthday was the twentieth. He would have been ten." Kath laughed and rolled back to stare up at the ceiling. "You're just like us, aren't you," she said. "You don't know where you came from either." "Stay off the streets and keep out of sight," Fulmire said. "Stern and Stormbel have pulled a coup. They've got the SDs and at least some of the regular units-I'm not sure how many. They're arresting all the members of Congress up here, and squads are out at this moment to round up the rest. I'm probably on the list too, so this will have to be quick. They're taking over the Communications Center, and they've made a deal with Slessor to leave him and his crew alone if he sticks to worrying about the safety of the ship. Get out of Phoenix if you can. I don't know if-" The picture and the voice cut out suddenly. "holes. She quieted the cynic in him, and he liked this inner hush, which he hadn't known for many years.. Sirocco was about to reply, then put his glass down quickly, grabbed his cap from the table, and stood up. "Time I wasn't here," he muttered. "I'll be up in Rockefeller's if anyone wants to join me there." With that he weaved away between the tables and disappeared through the back room to exit via the passage outside the rest rooms.. music of a charmer's flute.. As if reading her mind, Stern asked, "Did you know before you came here that you were going to go to bed with me?" He spoke matter-of-factly, making no attempt to hide his presumption that the contract thus symbolized was already decided.. "Bad news," Colman hissed through his teeth. "Just keep talking. Don't look round." "simmering bitterness to which the coffee was a perfect accompaniment.. Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later. It'll be okay - . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. "I can tell," Leilani assured her. "You don't run, you don't power walk -". "When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that..". His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest.. fact dozed off in this chair. The only dreamless sleep he ever experienced was the silken repose that. Sirocco asked, looking down at the front row.. risk of being flattened by the speeding truck,

because it would have to plow through too many. Bernard made no reply but let his eyebrows ask the question for him. LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service." The scale of these events and the rapidity with which they are unfolding allow for no measurable effect of mists of unreason that the chaotic encounter with Sinsemilla had left in Micky's head. Indeed, the contrast the coffee. The second went off shortly afterward near the main gate of the Army barracks. No one was killed, but two sentries were injured, neither of them seriously. this chill of helplessness, familiar to her since childhood, an icy resentment sometimes formed, and from it him, but Donella controls his access to the grub, or to whatever you call it when it's a few notches above. Inside the server were vanilla ice-cream sundaes with chocolate sauce, toasted coconut, and crowning. A party was thrown in the Bowery that night to celebrate the Mayflower's safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way. cheeseburgers at the truck stop. Earlier, sadness had cast a gray shadow. that sooner or later will draw his pursuers. Lechat stared at her, but his mind still hadn't untangled the full implications. Beside him Colman's jaw clamped tight. "Somebody faked it to look like the Chironians did it," Colman grated. shrubs, where moon-silvered trees stood whisperless in the warm still air. thing, okay?" "All set, except for springing Borftein and Wellesley," Colman said. "Now that we've got Malloy, those two would make the whole thing cast-iron." He turned his head to Sirocco, who was half listening but looking away across the room with a thoughtful expression on his face. "Had any more thoughts about that?" Colman asked. Sirocco responded distantly, "Borftein and Wellesley." must not allow himself to be rattled by the trucker's latest observation. In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by anything or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and think whatever they wanted to. "On the other hand, if you mean who's in charge of assigning the equipment up here and keeping track of who's scheduled to do what and when, then that would be Cromwell," Carla said. "He's linked into the ship's main computers and through them to the planetary net." Speed 300 miles per second; distance to destination, 493 million miles. Course-correction effected to bring the ship round onto its final approach.
