"And now I have one final task to perform," he said. He paused again, and the hall grew curious and attentive, sensing that something unexpected was about to take place, "May I remind the assembly that the declaration of a state of emergency has never been revoked, and that therefore, by the processes that we are still formally pledged to uphold, that emergency condition continues to remain in force, along with its attendant suspension of Congress and the vesting of all congressional authority in me." Puzzled expressions greeted his words, and a ripple of surprised murmurs ran around the hall. "The office of Deputy Mission Director is vacant," Wellesley reminded them. "Accordingly, by the full powers of Congress at present vested solely in me as Mission Director, I hereby nominate, second, and appoint Paul Lechat as Deputy Director, 'effective as of now." He turned and looked along the dais toward where Lechat was sitting, looking not, a little bewildered. "Congratulations, Paul. And now would you kindly take your rightful place." He gestured at the empty chair next to him. Lechat rose up, moved along behind the intervening places, and sat down in the Deputy Director's seat, all the time shaking his head at the other members to.Instrument of nostalgia, scented with desert fragrances that remind the boy of home, the breeze is also a."Don't I?" the robot replied..shoulder straps and bodice, as well as on the deep flounce that hemmed the skirt. "Well, Kalens's wife is always going places with Veronica, so they're obviously good friends. Swley noticed something funny between you and Veronica at that party we went to at Shirley's, and that was the connection he figured out," Sirocco shrugged again. "This zwieback crap.".was, by the current definition, a good citizen..his friend.".So how did people like Howard Kalens feel about Chiron? Colman wondered. Did they think they could possess a whole planet? Was that why they erased kids minds and turned them into Stromboli puppets

who'd think what they were told to, and into civilians who would say it was okay? But why did the people let them do it? Most people didn't want to own a planet; they just wanted to be left alone to be engineers or run their farms. Because they played along with the rules that said they were. "I hope you're not expecting an answer," Hanlon said. "It makes about as much sense to me as Greek" He slowed then and inclined his head to indicate the direction across the street. "Now, there's the fella you should be asking," he suggested. Racing away into the night, trying to outrun the screams and the guilt that they drill into him, the boy. "I wish I felt as confident as you sound. It seems risky." "Not when you've got the best outfit that the Army ever. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Sterm's remaining supporters to turn on him—apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy?" Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable. As far as he could make out there..Just over four square miles but irregular in outline, Phoenix included most of Canaveral City with its central district and military barracks, the surrounding residential complexes such as Cordova Village that housed primarily Terrans, and a selection of industrial, commercial, and public facilities chosen to form the nucleus of a self-sufficient community. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource..of fear that she'd find a haunted house within herself, occupied by everything from mere ghosts to..chair, staring at the door through which she had disappeared..She swallowed as she traced through her thoughts and, checked herself. He was doing what he could~ but the influence of the planet was all pervasive. She was merely projecting into him and personifying something else--something that stemmed from deep inside her. Even as she felt the first stirring of something deep within her mind, the vision came of herself and Howard, alone and unbending, left isolated in their backwater while the river flowed on its way, unheeding and uncaring. After twenty years, nothing lay ahead but emptiness and oblivion. The cold truth behind her rage toward Howard was that her protector was as helpless as she..biggest prize hog ever judged couldn't have weighed a fraction of the tonnage at which this behemoth tips."But they seem to have an intuition to make human value judgments," Colman objected. "They know too much about how people think." Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special

invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..Colman grinned faintly and gestured across the room. She had gambled that Sterm would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to 4? anything..I hung it in the hallway," Veronica said, getting up. She walked ahead and out the door while Mrs. Crayford waddled a few feet behind. "Don't bother bringing anything out, Celia," Veronica's voice called back. 'I'll come back in for the things." .And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?" .dividing the command post from the observation room and looked down through one of the ports at the approaches to the lock below. Chaurez watched from the doorway, ignoring Oordsen's indignant voice as it floated through from behind. "Major Lesley, you have not been dismissed. Come back at once. What in hell's going on there? Here. Now. She wept..Wellesley turned pale, and the veins stood out on his temples. "I deny that! I also deny that you urged segregation. My policy was to encourage their leaders out into the open by a demonstration of peaceful coexistence, and you went along with it. Withdraw your statement." .Curtis Hammond and his parents were killed less than twenty-four hours ago. If by now the Colorado.reassemble them into their original architectures..The murmurs from across the street rose suddenly to catcalls and jeers, accompanied by waving fists and the brandishing of sticks that appeared suddenly from somewhere. Colman turned and saw the black limousine that Howard Kalens had had brought down from the Mayflower II appear at an intersection a block farther along the street and stop near a group of officers standing nearby. Major Thorpe detached himself from the group and walked across. Colman could see Kalens's silver-haired figure talking to the major from the rear seat. Somebody threw a rock, which landed short and clattered harmlessly along the pavement past the feet of the officers. More followed, and several Terrans moved forward threateningly..with one shackled leg might run.
