

PERSPECTIVES ON THE MUSIC OF CHRISTOPHER FOX STRAIGHT LINES IN BROKEN T

In the gilded frame now was no longer then- reflection, but a rolling land of green and yellow. Nolan hadn't anticipated the intensity of his own reaction. But now, after the long trip back in the wheezing launch, he stood beside the crib in the spare bedroom and gazed down at his son with an overwhelming surge of pride. An aeon went by. There was no sound except the whistling of the. refused to end, she did come home, and for several days it was just as good as anything on the cassettes. "That's fine, but there is an even more important order of business. We have to go out to the dome and find out what the hell caused the blowout. The damn thing should not have blown; it's the first of its type to do so. And from the bottom. But it did blow, and." The staple on your license? why is it there? Suppose, then, die nucleus of a somatic cell were surrounded with the cytoplasm of an egg cell. Would the genetic equipment in the nucleus unblock, and would the egg cell then proceed to divide and redivide? Would it go on to form an individual with the genetic equipment of the original somatic cell and, therefore, of the person from whom the somatic cell was taken? If so, the new organism would be a clone of the person who donated the somatic cell. Crawford didn't know if he should let it drop. "No, just said he was restless and wanted to be movin' on. Sure hated to see bun leave. A real nice." "What is that stuff?". They began again, climbing faster than ever, but in another hour the bottom of the moon had already sunk below the edge of the ocean. At last they gained a fair-sized ledge where the wind was not so strong. Above, there seemed no way to go any higher. Fallows sat back in his chair and cast a routine eye around the monitor room. Everything seemed to be running smoothly at the crew stations beyond the glass partition behind his console, and the other displays confirmed that all else was as it should be. The reserve tank to Number 2 vernier motor had been recharged after a slight course-correction earlier and was checking out at "Ready" again. All the fuel, coolant, primary and standby power, hydraulic, pneumatic, gas, oil, life-support, and instrumentation subsystems servicing the Drive Section were performing well within limits. Way back near the tail, the banks of gigantic fusion reactors were gobbling up the 35 million tons of hydrogen that had been magnetically ram scooped out of space throughout the twenty-year voyage and converting over two tons of its mass into energy every second to produce the awesome, 1.5-mile-diameter blast of radiation and reaction products that would have to burn for six months to slow the 140-million-ton mass of the Mayflower II down from its free-cruise velocity.
