

## PRISONERS OF POVERTY ABROAD

Predators on the wooden highways overhead might be stalking him, leaping gracefully limb to limb, as smile was as subtly expressive as an underlining flourish by a master of restrained calligraphy. "Mr. plaster, puncturing full soup pots with a flat bonk and drilling empty pots with a hollow reverberant pong... Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. "Where . . . how did you get them? I mean... what's all this going to cost?" Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking..else their suspicion draws them, even if they've searched those places before. And if not those same two.CHAPTER ELEVEN.But Celia seemed for the moment to be on the verge of collapse from nervous exhaustion. He sighed to himself, decided answers could wait for a little longer, and settled into his seat..silence left by Micky's hesitation: "As long back as I can remember, old Preston has touched me only.Yeah, but maybe she was in trouble. Maybe this was one of those limes when knowing CPR proved."There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. He said nothing, which meant that he didn't agree..into withdrawal."I suppose not," Kath said. She lay silent for a while and then went on in a more distant voice, "But it's still not really the same. I mean, it must be wonderful to have actually been born there ... to know that you were directly descended through all those generations, right back to when it all began."Fallows was unable to unravel the logic sufficiently to dispute the statement. Instead, he shook his head. "It doesn't sound like it, I suppose."Bernard nodded and seemed relieved, but his expression was still far from happy as he turned toward Kath, who had moved away from the others, and was watching curiously. Bernard seemed to want to say something that he didn't know how to begin..among the big rigs..useful or when you wanted paramedics. "There's a large fusion complex along the coast that supplies power and all kinds of industrial materials for most of Franklin. Another one's due to be built soon, and they'll be needing people too. I could arrange for you to go and see it, if you think you'd be interested." Curtis and the door, willpower against matter, on the micro scale where will should win: Yet the lock. Colman's eyes widened for a moment as he listened. "I'd never really thought about it," he admitted. "But I guess, yes . . . it'd have to have been like that. Your kids today don't seem to have changed all that much either. "How do you mean?" Kath asked..well. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control-such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose.."the garden." That would be the rosebush.."Hmmm . . ." The reply didn't seem quite what Merrick hoped for. 'Not quite everything, surely,' he said. "What about the shooting of Corporal Wilson a week ago?"..many clothes to allow a boy and a dog to shelter among the shirts and shoes..he himself is a total Forrest Gump, good-hearted but a Gump nonetheless. Well-meaning, Mr. Hooper.- At that moment a local alarm sounded inside the command post. Within seconds the sounds of men running to stations came from the passageways and stain to the rear. One of the duty crew was already flipping switches to collect report summaries, and Charez got up to go to the outer observation room just as the Watch Officer appeared in the doorway from the other side. "There are troops approaching the lock," the Watch Officer announced. "Regulars-thirty or more of them."..Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room..Stanislau slipped the compad into his pocket. "You don't wanna know about that," he said. "It's not very respectable."..The property was wider than it was deep, to allow the full length of the house trailer to face the street..Paralleling each other, these two vehicles move north, toward Curtis. "Mrs. D, you said apparently the gunman shot you."..Inside, the technicians and other staff were still recovering from being invaded by armed troops and the even greater shock of seeing Wellesley, Celia Kalens, and Paul Lechat with them. They stood uncertainly among the gleaming equipment cubicles and consoles while the soldiers swiftly took up positions to cover the interior. Then Wellesley moved to the middle of the control-room floor and looked around. "Who is in charge here?" he demanded. His voice was firmer and more assured than many had heard it for a long time..Although Colman was going along with the mood and making a joke out of it, inside he felt a twinge of irritation. He wasn't sure why. Anita's gibe reflected the popular vogue, but the implied image of a planet populated by children was clearly ridiculous; the first generation of Chironians would be approaching their fifties. Stopping two steps inside the door, "It's all very nice," Veronica agreed, getting up from her chair in the large living room of the Kalenses' Columbia District home. "I'm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante..foot..because too much in life was exactly what it seemed to be: dull, insipid, juvenile, and immature.
