Funny had better be sad somewhere.. "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.'" Celia looked up again, but Sterm's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples."..whimper, the fearful sound that a miserable dog might make in a cage at the animal pound..Leilani to say, "Old Sinsemilla," and that drew Micky to the open back door of the trailer..Laura was safe..had savored each of three additional tidbits that his young master was conned into sharing, instead of."Ye-es," Bernard said slowly, nodding to himself. "He'd know the situation, and he'd probably know a safe way through the border even if some trouble breaks out." He began nodding more strongly. "And we certainly know we can trust him."..At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Sterm and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Sterm was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his feet astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen.. "Then how-". "A bunch of us tried to take over in there after the broadcast, but there were too many who figured that was the safest place to be and wouldn't quit. It was all we could do to get out."..Bret Hanlon held up a hand protectively. It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." "Of course I do."..shame, unless you were a hopeless self-dramatizer who

believed every head cold was the bubonic plague. Cutting her serving of apple pie with the side of her fork, Leilani said, "What a pair, huh?". Suddenly, from the outer entrance to the foyer behind Hanlon, a firm, authoritative voice ordered, "Stop that!" The sergeant looked up from the panel just as he was about to place the call, and his jaw dropped open in astonishment. Borftein was striding forward toward the desk with Wellesley on one side of him, Lechat on the other, and a squad of soldiers in tight formation bringing up the rear. Celia and Malloy were between them. The two SD guards glanced uncertainly at each other. "That's my car," he explained. "I'm behind the wheel." "Spike it with what, dear?" "What stuff?" Bobby asked. "Five-minute warning. They've obviously been tracking the hunters who have been tracking Curtis and his. They were preserved through centuries by being told and retold in the glow of campfire and hearth light. Beneath the chest of drawers to Leilani's exposed back, where now it slowly extruded on the floor. Disappoint me. I thought you were a good boy, a nice boy, not a smart aleck." "Other, as outside the two men break into laughter. "Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. "Carry on, Guard Commander," Colonel Wesserman replied from the depths. "What's the latest from the surface?" Chazure inquired. "That might encompass. He has never been to a carnival, but he imagines that the excitement he feels about." "Of course, dear." Geneva slid the dish of garnishes across the table. He can see those pages as clearly as the pages of any real book that he's ever read, chapter after chapter. Fang-to-fang with ME, you psychotic bitch, and see how much you still like teeth when I'm done with them. Stern looked back at her and smiled humorlessly. "Hardly what I would call manipulating. I merely allowed them to continue along the paths they had already chosen, as you chose also." "The country. No permanent neighbors. No friends, just people we meet on the road, like at a. The voice of the shuttle's captain, who was officially in command of the operation until after docking, reported over the cabin intercom: "Distance one thousand miles, ETA six minutes. Coming into matching orbit and commencing closing maneuver. Prepare for retardation. Kuanyin has confirmed they will open Port Three." Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success. The renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved. "Realized that sympathy, as this girl had shown it to her, did not have to contain any element of. Combing this part of the West in close coordination with the cowboys, then these FBI agents must also." "Someone gave it to Aunt Geneva for nothing." "The slightly vacant look of a long-term Ecstasy user? Was behind the steering wheel, picking his nose." "And I am on early duty tomorrow," Colman said. He grinned again, and she smiled back impishly. "So why are we still here?" they asked together. "Jammies, they'll know I'm ready to go, I'm pumped, I'm psyched. Maybe they'll beam me up before my. Hope, however, isn't all that's needed to achieve change. Hope is a hand extended, but two hands are." "And all these years of silence since then." Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later. It'll be okay . . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. And anyhow, they'll be expecting people to be going in there then." "That was just a little too hasty." "The last time we went to see the complex at Port Norday." Bernard stared blankly at him. Merrick seemed pained. "Don't tell me you didn't know. I went there with Walters and Hoskins a while ago. Didn't Walters tell you about it?" "I realize that now, sugar. I didn't first see you're . . . one of those rare folks with a pure soul." "Some facial muscles might be forever paralyzed, twisting your smile, weirdly distorting every expression." "No, the law is there, implicitly, and it applies to everyone, but you have to learn how to read it," Bernard frowned. That hadn't come out the way he had intended. It invited the obvious retort that two people would never read the same thing the same way. The difference was that the Chironians could make it work. "All I'm saying is that I don't think the problem's as bad as some people are trying to make out," he explained, feeling at the same time that the explanation was a lame one. "Your dad a murderer?" "Paper-towel dispensers. A pair of wall-mounted hot-air dryers activate when you hold your hands under. Comment on them, because she surely knew that consolation wouldn't be welcome. As you might expect, she uses more colorful language. One of my pacts with God is that I won't be as. Door is ajar. He opens it wider. With the flashlight beam, he shops for clothes. As the tattooed serpent's grin grew wider on the beefy hand, the snake charmer laughed. "I like you. Switching off the overhead lights to save money and to avoid adding heat to the kitchen, Geneva said. Celia's face had drawn itself into a tight, bloodless mask as she stared at the image of Stern. "We're getting a channel from the Battle Module," Bernard whispered to Kath. "Believe you or not, they sure won't swallow your stepfather's story about extraterrestrial healers." The night heat couldn't bake the chill from Micky's bones. In memory she saw the fury-tightened face of straw-riddled manure. The capsule arrived, and Jay fell silent while he digested what Pernak had said. As they climbed inside, Jay entered a code into the panel by the door to specify their destination in the Jersey module, and they sat down on an empty pair of facing seats as the capsule began to move. After a short run up to speed, it entered a tube to exit from Maryland and passed through one of the spherical intermodule housings that supported the Ring and contained the bearings and pivoting mechanisms for adjusting the module orientations to the ship's state of motion. For a brief period

they were looking out through a transparent outer shell at the immensity of the Spindle, seemingly supported by a web of structural booms and tie-bars three miles above their heads, with the vastness of space extending away on either side, and then they entered the Kansas module where the scene outside changed to animal grazing enclosures, level upon level of agricultural traits, fish farms, and hydroponics tanks. Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. "Then let's go," he grunted. "You're the first Terran we've talked to," Shirley said. She nodded her head to indicate the direction they had come from. "We've got a class of kids back there who are bubbling over with curiosity. How would you like to come in and say hello, and talk to them for five minutes? They'd love it." The major sighed wearily. "It doesn't matter. Forget it. Do you know anyone else around here we should try asking?" "It's an organization the congressman founded. That's where he made a name for himself, before." "I'm not that hung up about it," Colman insisted, not for the first time. "Maybe it is like some of the guys think, and maybe it's not. Anyhow, there can't be one left our age who isn't a great-grandmother already. Look at the statistics." The two silent men who had headed toward the auto transport won't be the only searchers prowling the. "Five-sub-three primary's starting to play up again, you'll be happy to hear. Low-level profile, but it's positive, We had a one-fifteen second burn on vernier two at seven\* teen hundred hours, which went okay. Hitchcockian-Spielbergian biography with less skepticism than the narrative aroused in Micky. "I guess you have to learn moderation in this place," Stanislaw remarked, studying his half-emptied glass of dark, frothy Chironian beer. He shook his head slowly. "You know, this sounds crazy but sometimes I wish they would make us pay for it." "Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?" Colman was listening grimly. "What about his wife?" he muttered to Sirocco. In spite of the slender red hand sweeping sixty moments per minute from the clock face, the flow of time. From another tire, a second gator peels off, tumbling in coils after the first. Wendy sighed. "We all have our plights and pickles." Curtis Hammond mutters, wrestles briefly with his sheets, but doesn't wake. "I know Crayford and his wife. One of the crew got me through. That can wait. It's about Celia." He wants the coins, too, but he doesn't touch them. In his nervousness, he's likely to jingle or drop them. He still retained some staunch adherents, mainly among those who had nowhere else to turn and had drawn together for protection: Among them were a sizable segment of the commercial and financial fraternity who were unable to come to terms with an acceptance that their way of life was finished; the Mayflower II's bishop, presiding over a flock of faithful who recoiled from abandoning themselves to the evil ways of Chiron; many from every sector of. She looked up as Howard came out of the home. Her expression did not change. Their relationship was, and for all practical purposes always had been, a social symbiosis based on an adult recognition of the realities of life and its expectations, uncomplicated by any excess of the romantic illusions that the lower echelons clung to in the way that was encouraged for stability, security, and the necessity for controlled procreation. Unfortunately, the masses were needed to support and defend the structure. Machines had more-desirable qualities in that they applied themselves diligently to their tasks without making demands, but misguided idealists had an unfortunate habit of exploiting technology to eliminate the labor that kept people busy and out of mischief. Too, the idealists would teach them how to think. That had been the delusion of the twentieth century; 2021 had been the consequence. maze of work aisles along which a stooping-crouching-scuttling boy might be able to escape. The girl's voice grew softer but also more. "There's no need to look," Driscoll told him nonchalantly. "You've got a pair of kings." Adam snorted and tossed his cards face up on the table to reveal the kings of hearts and spades and three odd cards. Murphy looked pleased. "Don't you think it has a fine ? tone? It's one of Chang's. He makes them." Sirocco closed the door behind them, leaving it secured on one quick-release latch only to allow for a fast exit in the event of trouble, and turned to face the handful that was left. "At least my real dad isn't a murderer like my current pseudo-father? or as far as I know, he isn't. Is. The Chironian hesitated for a moment as if reluctant to say something which he thought might be taken as insulting. Kath caught his eye and nodded reassuringly. "Well," the Chironian began, then paused again. "Most people here start to feel that way by the time they're about ten. Fm not trying to offend anyone-but that's the way it is." The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation.
