Too many things would have to be thought out again from the beginning, and such a task would require decades. And yet, nothing comparable to SP3 is anywhere near as advanced a stage of design at the present time, let alone near being constructed. The opportunity is unique and cannot, surely, be allowed to pass by. But at the same time we cannot afford the delay that would be needed to take advantage of that opportunity. Is there a solution to this dilemma?" He looked around as if inviting responses. None came..from the long winter on Mars. It stayed on for long minutes, then sputtered and was lost. Though it was. On December 12, 1968, I gave a talk to a meeting of doctors and lawyers in San Jose, California.* Naturally, I was asked to speak on some subject that would interest both groups. Some instinct told me that medical malpractice suits might interest both but would nevertheless not be a useful topic. I spoke on genetic engineering instead, therefore, and, toward the end, discussed the matter of cloning.. "No: why are you so accommodating to me, when I'm being such a bitch? Are you looking for an. She's crazy, he thought. The answer is that though all the genes are there in every cell of your body, they aren't all working alike. The cell is an intricate assemblage of chemical reactions, chemical building blocks, chemical products, and physical structures, all of which influence one another. Some genes are inhibited and some are stimulated, in a variety of ways depending on subtle factors, with die result that different cells in your body have genetic equipment in which only characteristic parts are working at characteristic rates..143.
